Full Stack Software Engineer

Professional Summary

Full Stack Software Engineer with 3+ years of experience designing, building, and deploying scalable web, desktop, and mobile applications. Creator of ADR Business Suite, an ERP platform for SMEs covering inventory, sales, procurement, reporting, and user management. Experienced in Angular, React, Node.js, TypeScript, MySQL, Electron, and cloud deployment, with hands-on expertise in backend architecture, DevOps, and Linux server administration.

Technical Skills

Languages

TypeScript, JavaScript (ES6+), PHP, SQL

Frontend

Angular, React, Ionic, HTML5, CSS3, Bootstrap, Responsive UI Design

Backend

Node.js, Express.js, REST API Development, Authentication & Authorization, Role-Based Access Control (RBAC)

Database

MySQL, MongoDB

Mobile

Electron, React Native + Expo, Ionic, Progressive Web Apps (PWA)

DevOps & Infrastructure

Git, Linux Server Administration, Nginx, SSL Configuration, DNS Management, Email Server Administration, Deployment & Maintenance, CI/CD Concepts

Professional Experience

Freelance Full Stack Software Engineer

Self-Employed

September 2023 - Present

- Architect and develop full-stack web, desktop, and mobile applications using Angular, React, Node.js, Express, and MySQL.
- Design scalable REST APIs, database schemas, authentication systems, and reporting modules.
- Deploy and maintain Linux production servers, email infrastructure, SSL, DNS, and web services.
- Lead projects from requirements gathering through deployment and continuous improvement.

Ionic Angular Developer

Ventis Inc

July 2023 - September 2023

- Developed cross-platform mobile applications using Ionic and Angular.
- Collaborated with backend developers and UI designers.
- Built reusable components and maintained clean application architecture.
- Improved application performance and maintainability.

Retail Sales Manager

Radiant Amore Services

November 2017 - November 2022

- Managed daily retail operations.
- Oversaw inventory control and stock management.
- Implemented customer service improvements.
- Trained staff and monitored sales performance.
- Developed practical business knowledge that later influenced the design of ADR Business Suite.

Classroom Teacher (NYSC)

Green Pasture Group of Schools

November 2015 - October 2016

- Delivered classroom instruction.
- Organized extracurricular activities.
- Mentored students.

KYC Officer

Gukon Nig. Enterprises

December 2011 - December 2012

- Managed customer verification and SIM registration.
- Maintained compliance with telecommunications regulations.
- Resolved customer issues.

Administrative Assistant

Donrose-RK Nig. Ltd.

October 2010 - January 2011

- Managed documentation and correspondence.
- Coordinated administrative activities.
- Improved office record management.

Selected Projects

ADR Business Suite (Flagship Project)

<https://business.adrsystems.app>

Full-stack ERP platform developed from scratch for SMEs to manage inventory, procurement, sales, invoicing, customer relationships, reporting, and business operations across web, desktop, and mobile.

Highlights

- Architected the entire application from the ground up.
- Developed frontend (Angular) and backend (Node.js/Express).
- Designed scalable MySQL database architecture.
- Built REST APIs powering all application modules.
- Implemented authentication, RBAC, reporting, dashboards, and analytics.
- Developed Electron desktop application and Ionic mobile app.
- Managed Linux deployment, Nginx, SSL, email server, DNS, and production infrastructure.
- Continuously adding new modules and performance improvements.

Technologies

React • Next.js • Node.js • Express • MySQL • TypeScript • React Native • Expo

ADR Partners (Currently in Development)

<https://partners.adrsystems.app>

A partner and affiliate management platform being developed to support the ADR Systems ecosystem.

The platform enables partners to register, promote ADR Systems products, track referrals, monitor commissions, manage payouts, and grow recurring revenue through a structured partner program.

Current work includes backend architecture, commission engine, referral tracking, authentication, dashboard development, reporting, and API integration with ADR Business Suite.

Technologies

React • Next.js • Node.js • Express • MySQL • TypeScript • React Native • Expo

Bonny Official (Ongoing)

<https://bonny-official.com>

Official digital platform for Nigerian recording artist Bonny.

Developing a modern React-based frontend with a custom Node.js content management system to manage music releases, biography, press content, galleries, events, and media assets.

This project expanded my experience with React while reinforcing scalable backend architecture and responsive user interface design.

Technologies

React • Next.js • Node.js • Express • MySQL • TypeScript

Property Experts (Expired)

Customized a Laravel-based real estate platform with property listings, agent management, SEO improvements, and an administrative dashboard.

Technologies

Laravel • PHP • MySQL

Education
